Public comment for December 3, 2026 Council meeting:

I'm writing about Pacific Power's proposal to raise electric rates by 57% for its California customers. I live in Crescent City, in Del Norte County, where many people are on fixed incomes and cannot afford about $120 more a month on their electric bills. I understand the increase is for wildfire concerns and upgrades, but that cost should come out of the company's profits, not be passed on to customers as an additional charge. The case is before the California Public Utilities Commission (Application A.26-11-009) and is not approved yet. I ask the City Council to stand up for residents here and pass a resolution opposing this increase.

Thank you,

Christina Elder
